

THUNDERBROOK

Equine Pure Essentials

Advanced feeds, superior ingredients

Because your horse's health is our priority

www.equinepure.com

Equine Pure Essentials is designed as a complete feed, but its concentrated, high quality formula enables it to compete with the main feed balancers on the market. The only feed with both high protein and oil (specifically omega-3) content, plus prebiotics and probiotics, low starch and low sugar and does NOT contain whole cereals, wheat, or the waste by-products wheatfeed or oatfeed. Ideal for horses prone to laminitis, azoturia or other metabolic syndromes, with a starch or sugar intolerance.

Try Equine Pure Essentials as a feed balancer - see the results and we are confident you will soon be using it as your main hard feed! A 20kg sack will last an average leisure horse approx 40 days or more as a main base feed!

Punching well above its weight.....

Product	Ingredients include Wheat, Wheatfeed, or Oatfeed*	Sugar	Starch	Protein	Fibre	Oil	Rec Retail Price / 20kg**
Pure Essentials Base Mix	No	3.0%	11.0%	21.5%	6.0%	26.5%	£35
